PixMenu

PixMenu, powered by iRestaurant, is an extension to the revenue model for any hotel/restaurant business unit with a committed ROI and enhanced visibility.

PixMenu helps the solution users to promote their restaurant business & offerings to customers in a far smarter way since it is targeted to reside in the smart phones.

The solution is an integrated application consisting of a web based admin panel being controlled by the restaurant owner and a mobile application (available on iOS & Android platforms) which is used by the end customers.

Store Selection Screen

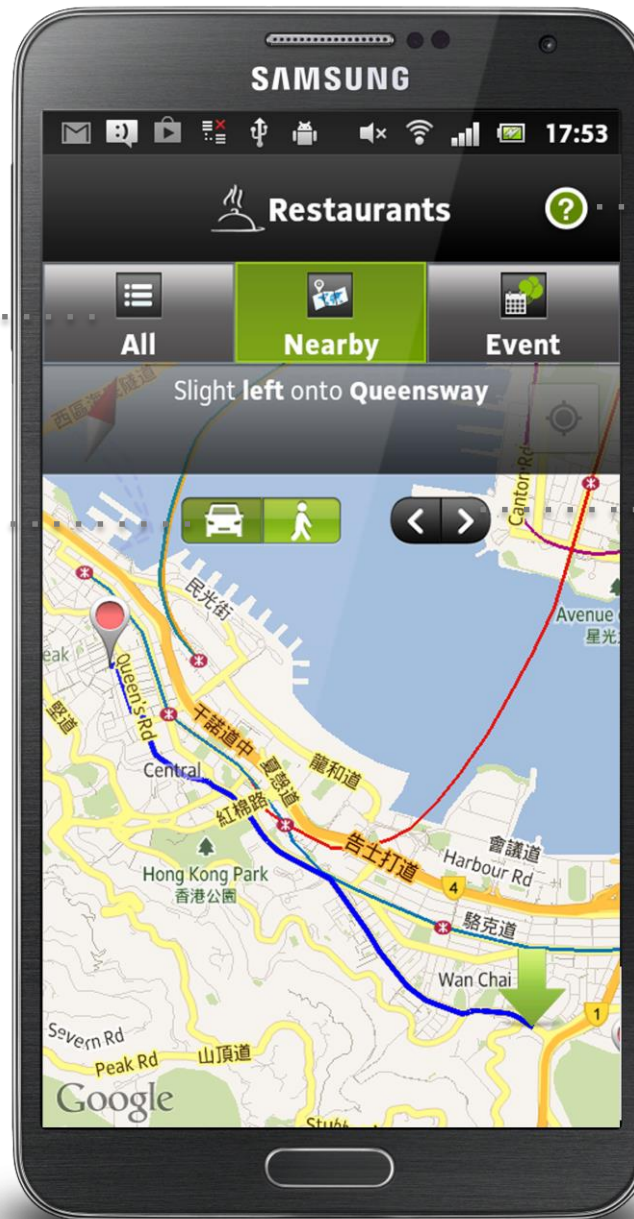

Store selection screen will allow you to select stores or branch.

Option Bar
